ALTITUDE RTT BASE RACK ADAPTER KIT

PRODUCT INFO BULLETIN NO.	2484
DATE	Nov. 2024
DESCRIPTION	Altitude BASE Rack Adapter Install Kit
PART NO.	804580 (for use with 1780810)
BARCODE	9332018121394
FITTING TIME	1hr to remove/refit or inc. if fitting tent and rack together.

OVERVIEW

- Fitting the Altitude RTT to a BASE Rack on certain wagons has previously not been easily possible due to the shared mounting real estate occupied by the Altitude channel mounts and the BASE Rack blades.
- The 804580 kit now enables this fitment.
- The Altitude mounting channels are positioned to fit directly to ARB's vehicle specific blade brackets, ultimately reducing roof load and the requirement for a BASE rack.
- For wagon fitments where a vehicle specific tent bracket is not available or a BASE Rack is still preferred, the 804580 kit fits a spacer between the rack and the blade to enable fitment of either the 1780810 BASE Rack RTT mounting blocks or the included U-Brackets.
- Toyota Landcruiser 100, 200, 300 and Y62 Patrol fitments with BASE rack are known to require this kit.
